

## Tanium Installation Guide

This document provides the steps required to install Tanium on your system.

### Prerequisites

- Ensure you have administrative privileges on the system.

### Installation Steps

#### 1. Run the Installer

- Locate the file `install.bat`.
- Right-click `install.bat` and select **\*\*Run as administrator\*\*** to execute it with elevated privileges.

#### 2. Apply the Registry Key

- After the installation completes, locate the file `Tanium\_Client\_HI\_HSA.reg`.
- Double-click `Tanium\_Client\_HI\_HSA.reg` to apply the registry settings.
- Confirm any prompts to add this information to the registry.

### Verification

Once both steps are complete, verify that the Tanium client is properly installed and running by checking the list of active services or the Tanium application.
